

OLAYANJU AYOBAMI ABRAHAM

Front-end Developer | Mobile Developer

SUMMARY

A Front-end and Mobile Developer with hands-on experience building responsive websites, web applications, dashboards, and mobile applications. Skilled in HTML, CSS, JavaScript, React, React Native, Supabase, PostgreSQL, Git, and GitHub. Experienced in UI implementation, API integration, authentication, database management, debugging, and responsive design. Seeking a front-end development role to contribute to real-world products and grow professionally.

PROJECT EXPERIENCE

Lead Generator | Front-end Developer

- Built a lead generation platform for collecting and managing customer leads.
- Developed responsive interfaces and structured frontend components.

Student Management System | Full-stack Developer

- Built a student management platform with Admin, Staff, and Student roles.
- Implemented authentication, student records, courses, enrollment, and database management using Supabase and PostgreSQL.

Prime Diagnostic | Front-end Developer

- Developed a responsive diagnostic centre website with service-focused pages and user-friendly navigation.

Mobile Projects | Mobile Developer

- Worked UniVerse, a campus guide application for university students. (in progress)

ADDITIONAL EXPERIENCE

- Translated UI designs and concepts into responsive web interfaces.
- Integrated APIs, authentication, databases, forms, and CRUD functionality.
- Used Git and GitHub for version control and project management.
